

WALMART – MANUAL TESTING PROJECT

Website: <https://www.walmart.com/>

Prepared By: Harish Kumar R

PROJECT OVERVIEW

This project focuses on validating the core functionality of the Walmart e-commerce web application. The objective is to ensure users can register, log in, search for products, add items to the cart, and complete purchases successfully.

TESTING TYPES COVERED

- Functional Testing
 - Integration Testing
 - System Testing
 - Smoke Testing
 - Compatibility Testing
 - Impact Analysis
-

FUNCTIONAL TESTING – SCENARIOS

Sign In / Create Account

- Verify the presence of logo, input fields, and Continue button.
- Verify user can enter a valid mobile number or email.
- Verify validation message for invalid inputs.
- Verify navigation to next page after clicking Continue.

Create Account Page

- Verify First Name, Last Name, Phone/Email, and Password fields are available.
- Verify Terms & Conditions and Privacy Policy links.
- Verify Continue button functionality.

First Name Field

- Accepts alphabetic characters.
- Validate minimum and maximum length as per requirement.

Last Name Field

- Accepts alphabetic characters.
- Validate boundary conditions.

Phone Number / Email

- Accepts valid format.
- Rejects alphabets in phone number.
- Validate different email domains.

Password

- Accepts alphanumeric and special characters.
- Enforces minimum length.

Home Page

- Verify search bar, sign in, cart, wishlist, shipping options, departments.

Search

- Verify placeholder text.
- Verify relevant results are displayed.

Cart

- Add single and multiple products.
- Remove product from cart.
- Validate total price and quantity.

INTEGRATION TESTING – SAMPLE SCENARIOS

- After successful registration, data should be stored in database.
- After login, user name should display on home page.
- Reset link should be sent for forgot password.
- After search, correct products should display.
- Cart should show correct quantity and total.
- After payment, order ID should be generated.

SYSTEM TESTING – END TO END

- New user → Register → Login → Search → Add to cart → Payment → Confirmation.
- Registered user → Wishlist → Move to cart → Purchase.
- Apply coupon → Discount reflected in final price.
- Reorder from My Orders.

SMOKE TESTING – CRITICAL FLOW

- Login
 - Product view
 - Add to cart
 - Payment
 - Order confirmation
-

TEST CASE

- ✓ FUNCTIONAL TESTING, INTEGRATION TESTING, SYSTEM TESTING, SMOKE TESTING.

DOCUMENTS

FUNCTIONAL TESTING:

- 1) TEST_CASE_01– [FUNC TEST CASE 1](#)
- 2) TEST_CASE_02- [FUNC TEST CASE 2](#)
- 3) TEST_CASE_03- [FUNC TEST CASE 3](#)

INTEGRATION TESTING:

1. TEST_CASE_04 - [INTGR TEST 1](#)

SYSTEM TESTING

1. TEST_CASE_05 – [SYSTEM TEST 1](#)

SMOKE TESTING:

1. TEST_CASE_06 – [SMOKE TEST 1](#)

IMPACT ANALYSIS (Example Change)

Change Description: Search bar was not responding on first click. Fix implemented in click event handling.

Areas to Retest: - Search input - Suggestions - Results page - Filters and sorting - Cart update after search.

1. *Change Description:*

- The search bar was not working on the first click. We updated the code so it now responds correctly the moment you click it.

2. *Direct Impact:*

- Homepage Search Bar
- Voice Search if enabled
- Recent Searches
- Search button functionality

3. *Indirect Impact:*

Because the search bar is used across multiple pages, these areas may also be impacted:

- Results Page
- Filters and Sorting
- Product Details Page
- Cart icon Search update after search result action
- Search analytics
- API call for suggestion & search results

Testing Requirements:

✓ **Retesting**

- Verify search input works on first click
- Verify search results are returned correctly

✓ *Regression Testing*

- Search suggestions display correctly
- Filters work after search
- Sorting works normally
- Pagination works on results page

✓ *Compatibility Testing*

- Chrome, Firefox, Edge.
- Android and iOS mobile browsers

✓ *UI Validation*

- Search bar alignment, font, placeholder
- Responsive behavior on all screen sizes

COMPATIBILITY TESTING

Operating Systems

- Windows 10 / 11

Browsers

- Chrome
- Edge

Mobile Devices / Network

- Android
 - 4G / 5G
-

DEFECT REPORTING APPROACH

Each defect contains: - Defect ID - Summary - Steps to reproduce - Expected result - Actual result - Build / Environment - Attachment (screenshot or video)

Defect ID: DEF_01

Summary: Search bar not responding on first click.

TEST ARTIFACTS PREPARED

- Test Scenarios
 - Test Cases
 - Defect Report
 - Impact Analysis
-

OUTCOMES

Application stability improved after retesting and regression. Critical user flows validated for release readiness.
